Profile

I am a software engineer and entrepreneur, self-employed since 2018. I co-founded Groovy at 16 and wrote its first version (later 16M+ servers, $1M+ revenue). I co-own Hydra (6.1M servers). With Jochen Segner, I built the official SoundCloud Discord bot and Hey, Netflix.

Experience

Hydra, *Co-owner and engineer* 2020 – present
Discord bot founded by Jochen Segner. Leveling, welcome and reaction roles. 6.1M servers.
- Built most of the hydra.bot web app, including premium subscriptions (Vue, Nuxt)
- Second-largest contributor to the Kotlin backend
- Lead frontend, infrastructure and the monorepo for the 2026 rebuild (Rust, Kubernetes)

SoundCloud, *Engineer and project lead (contract)* 2021 – present
Official SoundCloud Discord bot, on 667K servers, built and run with Jochen Segner.
- Manage the project for SoundCloud, from the 2022 launch to the move to OAuth 2.1
- Lead the web frontend (TypeScript, Nuxt) and contribute to the Kotlin backend
- Set up and run production infrastructure in the SoundCloud AWS organization (Terraform)

Digital Office 24, *Software engineer (contract)* Feb 2026 – present
Sole engineer. Built and run the customer platform: demo booking, customer portal, billing and HubSpot CRM integration (Bun, Hono, Next.js). Also handled GDPR and consent.

Finaure, *Tech lead (contract)* Sep 2026 – present
The self-funded digital wealth-management startup of Dr. Jürgen Lange, built AI-first. In its core team, built the independent review program and an implementation-agnostic test lab.

Top.gg, *Software engineer (contract)* Jun 2026 – present
Built frontend features for reviews, ad campaign health, SEO and internationalization (Next.js), plus a signed macOS app for infrastructure status (Electron).

“Hey, Netflix” Discord bot, *Software engineer (contract)* 2022 – 2023
Built with Jochen Segner for Netflix, credited to HydraBot. 150K+ servers and 250K+ sessions in its first month; billed as the fastest-growing branded app on Discord. 2023 Webby Honoree.

Groovy, *Co-founder* 2018 – 2021
Discord music bot I co-founded with Nik Ammerlaan. 16M+ servers until YouTube shut it down.
- Wrote the original bot at 16 (Python, then Java)
- Led frontend and monetization as revenue passed $1M

Education

University of Passau, *Computer Science (no degree)* 2020 – 2021
Left after the first semester to focus on my own projects.

Gabelsberger-Gymnasium Mainburg, *Abitur* 2020

Volunteering

BUNDjugend Bayern, *Camp leadership team* 2022 – present
Member since 2018. I help organize Zeltlager, its largest yearly tent camp for kids and teens.

Skills

Programming: TypeScript, Kotlin, Java, Python, Rust; Vue, Nuxt, React, Next.js; Spring Boot
Infrastructure: AWS, Terraform, Kubernetes, Docker, Google Cloud, Cloudflare, Postgres, Redis
Business: client and project management, monetization (Stripe, Chargebee), GDPR
AI: multi-agent development workflows across machines, LLM integration
Languages: German (native), English (fluent)
